Website Updates Report

June 2026

Dear Danilets team,

We are pleased to share the results of the latest round of improvements made to your website. Below you will find a clear description of every update — what was changed, why it was done, and what benefit it brings to you and your customers.

1. Navigation — "Learn More" Buttons Now Work Correctly

Fixed broken navigation links

When a visitor clicked "Learn More" on the Detailing or Cleaning service card on the home page, they were sent back to the home page instead of the correct service page. This has been fixed — clicking "Learn More" on Detailing now opens the full Detailing page, and clicking "Learn More" on Cleaning opens the full Cleaning page.

2. Special Offers Management in the Admin Panel

New "Special Offers" section in the CRM

A brand-new section has been added to the admin panel where you can create, edit, and remove promotional offers. Each offer can include a title, a short description, a discount percentage, an expiry date, and an optional photo.

Live offers displayed on the website automatically

Once you publish an offer in the admin panel, it appears immediately on the website banner (the dark strip at the bottom of the main page). If you have multiple active offers, the banner will cycle through them automatically. When an offer expires or is deleted, the banner reverts to "Deals Coming Soon" on its own — no manual work needed.

3. Website Layout — Equal Spacing on All Pages

Consistent padding and margins across the entire site

Several pages — including the Detailing page and the About Us page — had sections that stretched all the way to the edges of the screen with no breathing room. This has been corrected. Now every section on every page has the same balanced left and right spacing, giving the website a clean, professional look on all screen sizes.

4. Vehicle Information in Your Account

Personal and Commercial vehicles stored separately

The "Vehicle Information" section in the customer account has been completely rebuilt. Vehicles are now divided into two clear categories — Personal and Commercial — so customers can keep their personal car and work vehicle information neatly separated.

Add as many vehicles as needed

Previously only one vehicle could be saved. Now customers can add any number of vehicles in each category, and can remove vehicles they no longer use.

Upload a photo for each vehicle

Each saved vehicle now has an optional photo upload. Customers can attach a picture of their car or truck, making it easy to identify the right vehicle at a glance.

Auto-fill vehicle details when booking a service

When a customer starts a new service request, a "Use a saved vehicle" option now appears at the top of the vehicle information step. They can select any of their saved vehicles and all the details (year, make, model, color) are filled in automatically — no need to retype information every time.

5. Address Fields in Personal Profile

Customers can now save their address

The personal profile page previously had no address field. Now customers can save a Personal Address, a Commercial / Business Address, or both — selected with a simple toggle button. This information is stored securely in their account for future use.

6. Past Orders — Fully Readable Information

All order details now shown in plain English

When a customer opened a past order, some fields were showing internal system codes instead of understandable text — for example "post_construction", "property_mgmt", or "3000_5000". Every field has now been converted to clear, friendly language — for example "Post-Construction Clean", "Property Management", or "\$3,000 – \$5,000". Customers can now read and understand all their order details without confusion.

Summary of All Improvements

#	What Was Done
1	Fixed "Learn More" buttons — now lead to the correct Detailing and Cleaning pages
2	New Special Offers section in admin panel + live offer banner on website
3	Uniform spacing and padding fixed on all pages
4	Vehicle accounts: Personal/Commercial split, multiple vehicles, photo upload, auto-fill in booking
5	Personal and Commercial address fields added to customer profile
6	All order details now displayed in plain, customer-friendly English

All changes are live and have been successfully deployed.

If you have any questions about any of the updates described above, please reach out and we will be happy to assist.
